

## ► Flirt With New Jewel Tones

The News: Gem-bright shades to wear in vivid combos—like the blue lids and green lashes here—when you're in a playful mood. "It's dream makeup," says Greenwell. How-to's: In this case, the eyes have it. Brush the shadow, pastel blue with touches of green and gold shimmer, all over lids, concentrating color at the outer corners. Blend up to your brow bone, but leave the area right under brows color-free. Next, green mascara for upper and lower lashes. If you don't want to go this far, tone down the green with a black-mascara undercoat. To help make the look more wearable, use a black eyeliner to define the eyes.
